GitHub — Portfolio

Career Objective

Passionate Computer Science student aspiring to become a Python Full Stack and AI Developer. Interested in building scalable web applications, AI-powered solutions, and solving real-world problems through software development.

Education

Bachelor of Engineering (Computer Science & Engineering) 2024–2028

RajaRajeswari College of Engineering, Bangalore

Skills

Languages: Python, JavaScript

Frontend: HTML5, CSS3, Tailwind CSS, React

Tools: Git, GitHub, VS Code

Projects

AI-Based Flash Card Generator

Developed an AI-powered application that converts study material into question-answer flashcards using AI. Built a responsive interface with modern web technologies.

Sri Venkateshwara Enclave Website

Freelance responsive real-estate website featuring property listings, galleries, amenities, and optimized user experience.

Gooyer Living Interior Designers Website

Developed a full-stack website showcasing interior design services, project galleries, and customer inquiry features.

GPA Calculator (PyQt5)

Desktop application to calculate SGPA and CGPA. Learned Python fundamentals including functions, loops, conditionals, and GUI development.

Centralized Policy-Driven Authorization Framework

Ongoing

Backend developer working on API security using policy-driven authorization, API gateway enforcement, AI-based anomaly detection, and immutable audit logging.

Training & Certifications

Full Stack Web Development – GeeksforGeeks (Jul 2026 – Present)

Hands-on full-stack web development with practical projects.

Scientific Computing with Python – freeCodeCamp (Apr 2026 – Present)

Learning Python fundamentals, OOP, file handling, modules, and project development.

Extra Curricular Activities

- Participated in hackathons and AI/full-stack development projects.
- Practice Data Structures and Algorithms regularly.
- Create AI educational content on YouTube.
- Continuously learn modern web and AI technologies.
